About Me

I am a full stack web developer, passionate about technology and software development with the purpose of entering in this amazing world and reach the goals of my team through my knowledge, keep learning every single day to have the best tools in order to give the best service to the clients.

Skills

Front-End: Javascript, HTML5, CSS3, ReactJS, Gsap.

Back-End: NodeJS, JWT, Express, PostgreSQL, Sequelize.

Tools: Git, GitHub, Responsive Development, MS Office.

Professional: leadership, proactive, problem solving, quick adaptation, critical thinking, teamwork.

Education

ACADEMLO | March 2022 - September 2022

Remote Full Stack Development Program, Intensive

- Create real-world HTML/CSS/Javascript/React/Node/Express/PostgreSQL full-stack projects.
- Developed +10 web apps through remote programming using all my front-end and back-end skills, methods and tools accumulating 450+ hours of remote coding.

Santa National University | April 2015 - December 2019

Mechanical Engineering, Full Time

Proof of my knowledge

Pokedex | 50+ hours of coding | *Front-End*

- A website developed with **HTML/CSS/ES6/ReactJS/Redux/React-bootstrap/Axios(API)** where you can search between all pokemons and filter by name or type of pokemon, then you can see all abilities of every single pokemon by clicking on it, to enter in the pokemon's world you must fill out the input with your name.

Crud User App | 30+ hours of coding | *Front-End*

- A website developed with **HTML/CSS/ES6/ReactJS/Axios(API)** where through a form you fill in your data and all registered users go to a user's list where you can update or delete any user of the list applying the CRUD method in my code.

Academlo Restaurant | 40+ hours of coding | *Back-End*

- This app was developed using **NodeJS/Express/Sequelize/JWT(Authentication)/Postman/PostgreSQL** where the app can create, get, update and delete all the models that was created in the app but with database restriction where only user with a specific role can access and change database.
-

Other projects

Front-end

- [Quote app](#) | 20+ hours
- [Rick and Morty app](#) 30+ hours
- [Weather app](#) | 20+ hours

Back-end

- [Check in Check out](#) | 30+ hours
- [Game Store](#) | 30+ hours
